Eriez® Offers Free Recycling Industry E-Newsletter

Erie, Pa. — Recycling industry professionals can now stay current with up-to-the-minute information on recycling products and news by subscribing to a [free e-newsletter](#) from Eriez®, world authority in advanced technology for magnetic, vibratory and inspection applications.

“The Eriez Orange Connect Recycling e-newsletter was developed to provide readers with information to help them run more efficient and profitable recycling operations,” explains Al Gedgaudas, Eriez Resource Recovery Market Manager. “Each issue highlights the latest product innovations from Eriez.” He explains, “Eriez equipment, either as individual units or complete systems, is designed for the most efficient and economical processing of municipal solid waste, comingled recyclables, shredded automobiles, electronic scrap, glass cullet, plastic (PET), foundry sand and many other resource recovery operations.”

Eriez Orange Connect Recycling e-newsletters also include case studies profiling Eriez customers and describing their experiences with Eriez’ products and services. Special issues highlight recycling trade shows and industry news.

“Today, technical advances and new techniques come so fast that it is often difficult for professionals to stay on top of the latest developments in their field,” says Gedgaudas. “With more than six decades of experience solving problems in the recycling industry, Eriez is on the leading edge when it comes to recycling industry products and solutions. Our recycling e-newsletter is a great way for us to share valuable information with our readers to help them stay competitive in this rapidly changing industry,” he adds.

The screenshot shows the 'orange connect' e-newsletter interface. At the top, it says 'recycling issue, no. 1' and 'www.eriez.com/Products/Markets/Recycling'. The main content area features a 'SOLUTIONS FOR RECYCLING INDUSTRIES' section with a photo of a recycling facility and text about Liberty Iron & Metal's experience with Eriez equipment. Below this is a 'Join Our Community' section with links to Facebook, YouTube, and the Eriez website. There are also sections for 'Other Featured Products' including 'Suspended Electromagnets', 'FineSort', 'ProSort II - New and Improved', 'RevX-E™ Eddy Current Separator', and 'E-Scrap Tower Sorter'. Each product section includes a brief description and a link to the product page. At the bottom, there is a copyright notice: '© 2010 ERIEZ MANUFACTURING | ALL RIGHTS RESERVED www.eriez.com'.

ProSort II - New and Improved

Eriez' new ProSort II enables superior metal recovery at a fraction of the cost to operate and maintain an air driven sorter. With a unique inverted paddle design, the new ProSort II airless metal recovery system uses high sensitivity metal sensors aligned with low energy electromagnetically driven paddles to separate valuable metals from waste material. ProSort II features twice as many sensors per paddle than the original ProSort. This means better detection of smaller pieces. Even wire!

RevX-E™ Eddy Current Separator

The new RevX-E Eddy Current Separator is magnetically designed to provide enhanced separation of nonferrous metals. This equipment enables maximum separation. It is ideally suited for purifying cullet and plastics, as well as recovered valuable metal from secondary metals and incineration ash. Eriez has both eccentric and concentric models available. Contact Eriez to discuss your specific application needs.

E-Scrap Tower Sorter

Eriez' E-Scrap Tower Sorter is a multi-stage, total metal recovery system ideal for e-scrap processing. It is designed to sort aluminum, stainless steel, copper cables, heavy fractions -- and even recovers plastic coated wires using a number of different modular sorting technologies. Common configurations may include rare earth drum separators, eddy current separators, inductive sensor sorter or near infrared sensors (NIR).
