Plate Magnets Shipped Within 24 Hours through EriezXpress™ Program

Erie, Pa. — Eriez®, world authority in magnetic, vibratory and inspection applications, now offers next-day shipment on a select number of [Plate Magnets through the EriezXpress™ Program](#). This quick order processing system helps speed up delivery of in-stock Eriez equipment when a customer needs an immediate solution.

Through **EriezXpress**, Plate Magnets ordered by 4 p.m. can be shipped the next business day (upon credit approval). This method streamlines the order-to-shipment process by simplifying product ordering, modifying inventory control and designating a team of Eriez employees to handle the last-minute requests. The Plate Magnets available through **EriezXpress** fall into three product lines:

Super Power Plate creates a 2-3 inch magnetic field to reach into thin burdens of material to remove large tramp metal contamination. The magnet measures 7 5/8 inches long and 2 1/16 inches thick. It is shipped with one tapered step to enhance separation performance and hinge and latch for ease of installation. Width sizes available through **EriezXpress** include 8, 10, 12 and 14 inches to match chute and conveyor width. Maxi Power Plate creates a 3-4 inch magnetic field to reach into thin burdens of material to remove medium tramp metal contamination. The magnet length measures 10 5/8 inches and is 2 11/16 inches thick. It is shipped with one tapered step to enhance separation performance and hinge and latch for ease of installation. Width sizes available through **EriezExpress** include 8, 10 and 12 inches.

Rare Earth (RE) Plate Magnets are ideal for shallow burdens where product purity is the number one priority. The RE circuit removes fine and feebly magnetic contaminants. The magnet length measures 5 1/2 inches and is 1 3/16 inches thick. It is shipped with one tapered step to enhance separation performance and hinge and latch for ease of installation. Width sizes available through **EriezXpress** include 6, 8, 10 12 and 14 inches.
