Magnetic, Vibratory and Metal Detection Solutions for Industry

NEWS RELEASE

For Immediate Release

E-Z SLIDETM HORIZONTAL MOTION CONVEYOR

ERIE, PA - In food processing and packaging, Eriez' **E-Z SlideTM Horizontal Motion Conveyor** eliminates breakage, oily tray build-up and coating flaking common with most vibratory conveying equipment. The conveyor's horizontal motion also reduces damage and improves part handling in the metalworking, ceramic, powdered metal and foundry environments.

A new two page brochure provides specifications on Eriez' recently introduced **E-Z Slide Horizontal Motion Conveyor** system. The literature details the conveyor's gentle sliding motion as well as its mechanics, applications and specifications.

To receive Eriez' VB-3676 brochure, call toll-free in the U.S. and Canada at (888) 300-3743 or (814) 835-6000. For online visitors, download a pdf at www.eriez.com or send e-mail to eriez@eriez.com.

Eriez is recognized as the world authority in advanced technology for magnetic, vibratory and metal detection applications. The company's magnetic lift and separation, metal detection, materials feeding, screening, conveying and controlling equipment have application in the process, metalworking, packaging, recycling, mining, aggregate and textile industries. Eriez manufactures and markets these products through eight international facilities located on five continents.
