

Spreader Plates

Precision Lifting, Simplified

Eriez Spreader Plates are designed to distribute magnetic holding forces safely and efficiently.

Built for use with Eriez SafeHold® and Selecto series lifting magnets, Spreader Plates offer a simple, yet effective material handling solution. Avoid unwanted material sagging or bending by adding an additional point of weight distribution. Help lift and provide stability to larger parts with center holes or burned-out sections, in addition to steel coils or shaft coupling halves. Longer loads — such as rods, beams, and tubes — can be offloaded quickly and securely.

These in-stock units are rugged and straightforward, ideal for the shop floor and anywhere Eriez Lifting Magnets are used.

Features

- Available in 272 kg (600 lb) and 680 kg (1,500 lb) capacities
- 360-degree swivel hooks
- 51 mm (2") center openings
- Specially designed for Eriez equipment
- Adjustable spacing options

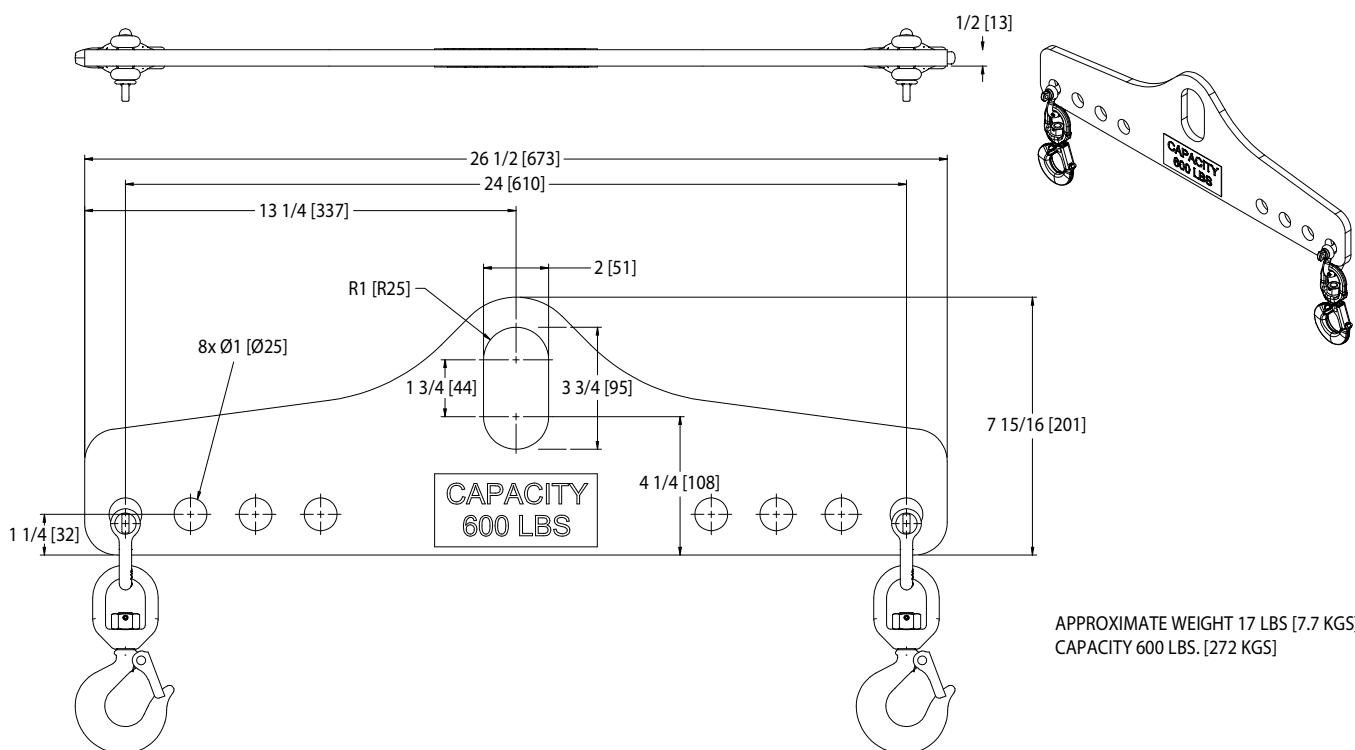

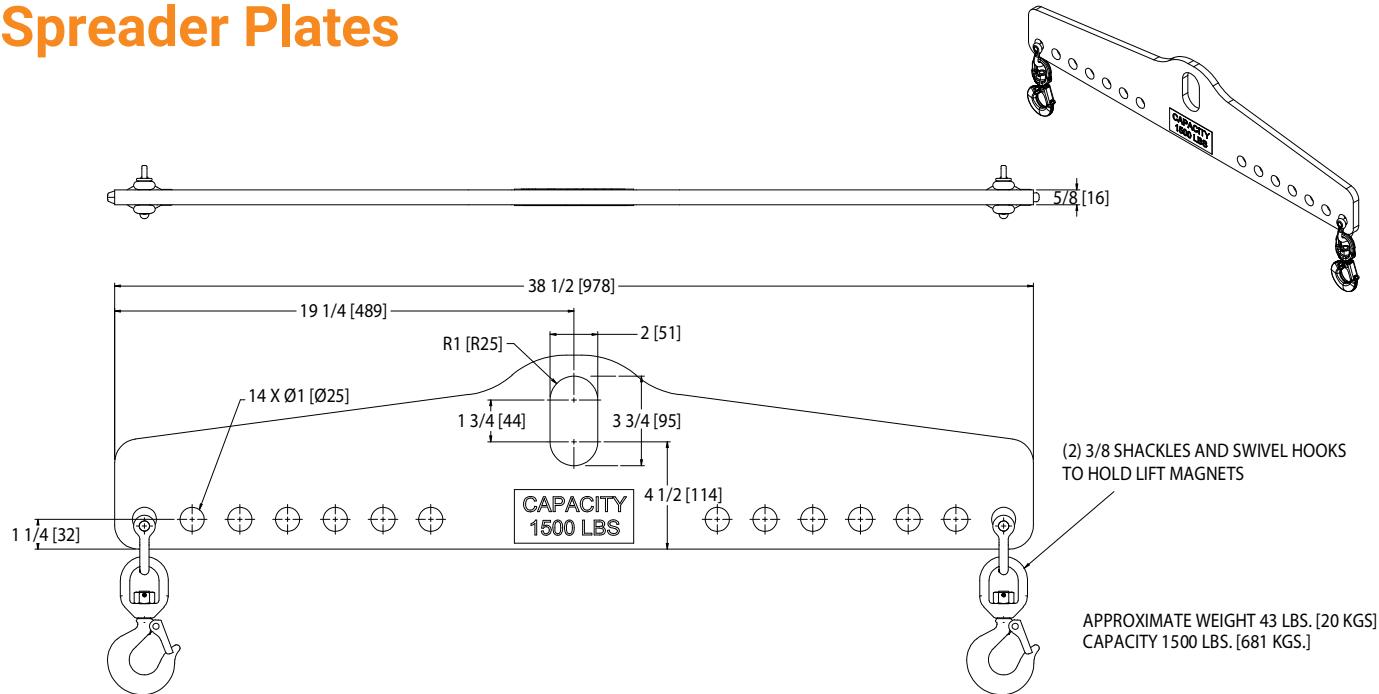

Span (cm)	Span (in)	Capacity (kg)	Capacity (lb)	Compatibility	
61 cm	24"	272 kg	600 lb	RPL-2 XPL-3/2 APL-6 EPL-4 RPL-2 RPL-7 ST-4D XPL-3/2 XPL-6/4	
91.5 cm	36"	680 kg	1,500 lb		

Applications

- Metalworking
- Metal Fabrication
- Manufacturing
- Construction
- Recycling and Recovery
- Warehousing and Distribution
- Maintenance and Plant Operations
