## **Eriez® Now Stocks More Metal Detection, Magnetic Separation and Vibratory Feeding Equipment for Faster Deliveries**

Erie, PA—[Eriez®](#) announces it has increased inventory levels for [metal detectors](#), [magnetic separators](#) and [vibratory feeding](#) equipment included in the company's [Quick Ship stocking program](#). Eriez says this adjustment has allowed them to ship products even faster to support rising demand.

Many of Eriez' most popular products--from grate magnets to vibratory feeders and metal detectors--are offered through its [Quick Ship stocking program](#). "Most of these quick-ship items are available in three convenient designations: next-day, 5-day and 10-day shipment," says Eriez Director of Sales and Product Management Jeff Kaveney.

The Eriez [ProGrade® quick ship magnetic separator line](#) includes a selection of grates, plates, traps and tubes to provide a solution for every processing application. Kaveney says, "Whether you need a plate magnet for equipment protection or a high power sanitary grate to protect product purity, ProGrade gives you the best for less." Customers can choose from Ceramic, Rare Earth or industry's strongest Xtreme® Rare Earth magnet strength to satisfy their specific needs.

Additional Eriez magnetic separation equipment available for quick shipping includes drawer magnets, pneumatic cartridges, handheld inspection magnets and pull test kits.

Eriez [Quick Ship program](#) also offers stock [Xtreme® Metal Detectors](#) for delivery in two weeks or less. "In some cases, we can ship the metal detector within two days," says Kaveney.

The company stocks 24 equipment SKUs for quick assembly and delivery. Models include Eriez' Xtreme Metal Detector Conveyor System, Liquid Line Metal Detector, Vertical Low Profile System and Vertical Form, Fill and Seal Metal Detector. Eriez' feature-rich [Xtreme Metal Detector](#) is designed to achieve the highest levels of sensitivity to detect small ferrous, nonferrous and stainless steel contaminants.

[Feeders Fast](#) offers nearly 40 feeder models using stock components, available for shipment within five days. These electromagnetic vibratory feeders are AC-powered, making them extremely reliable and energy efficient. They are ideal for many sanitary, industrial and process applications.

[Compact feeders](#) up to 20 TPH are available in tray sizes to 16 inches wide and 60 inches long. [Heavy duty feeders](#) are offered in four models with capacities from 70 to 420 TPH.
